Missed Encounters

For this edition Samezoblo has teamed up with a group of enthusiasts.

Some of the city's dirty corners have been explored and exposed. No neighborhood is immune to the general neglect.

While heavily cosmetic renovations have been taking place across Tbilisi, this is still unable to provide broader solutions to the complex challenges the city faces.

Waste management, over tourism, gentrification, real estate speculation, heavy traffic, mobility issues, homelessness.

What follows does not offer any solution or investment to those debilitating matters, yet.

It is an intimate and limited account on how the impact of our intricate and lavish relationship with consumption both in our homes and on the streets shapes the city.

meaning of the word dating shifted after the sexual revolution. Informal use referring to a romantic/sexual relationship itself beyond trial stage, but prior to marriage. Although informal, this meaning is used in formal speech as well as writing. Although taboo a lot for much of history, citation needed, premarital sex has become more common. Social rules regarding dating vary considerably to variables such as social class, sexual orientation and gender. One of the main purposes of dating is to find a mate. Two or more people may date each other for a variety of reasons. Physical attraction, personality, financial status, and other aspects of the person involved are considered, and as a result, feelings can be hurt. While some of what happens in dating can be explained by an understanding of basic human psychology, there is still a lot of room to experiment and learn. In the 18th and 19th centuries, sources of advice for dating included dating coaches, friends, and family. There are numerous ways to find a date, including blind dates, classified ads, dating websites, and many other sources.

An aerial, high-angle photograph of a city street. The street is filled with many cars, mostly white, parked in rows on both sides. In the center of the street, there is a green space with trees and a pedestrian crossing. The perspective is looking down the length of the street, which recedes into the distance.
